**Framing - Wood**

- **WARNING**
  - Ensure weight of wall above is **NOT** carried by the appliance.

- **WARNING**
  - There are restrictions for where drilling and screwing may take place. See Installer's Manual.

---

**HeatShift plenum or duct plates framing required (top, front, or sides).**

- Requires steel stud under outlet opening when using LDK4 plenum.

- Combustible framing material.

- HeatShift pipes (4) 5" Ø connect to plenum or termination plates above, see “Appendix D” of Installer's Manual.

- Combustible wall finish zone

- Zero clearance stand-offs (2 front, 2 rear).

- Max 1-1/4" [32 mm] thickness combustible wall finish allowed, if within 4" of opening.

---

**Dimensions:**

- 46-1/2" [1181 mm] from wall
- 18-1/2" [470 mm]
- 46-3/4" [1187 mm]
- 11-1/4" [286 mm]
- 8" [204 mm]
- 15" [381 mm]
- 2" [51 mm]
- 10-1/4" [261 mm]
Framing - Steel

**WARNING**
Ensure weight of wall above is NOT carried by the appliance.

**WARNING**
There are restrictions for where drilling and screwing may take place.

- Combustible studs (2) proud of wall surface required to mount framing kit. Requires solid connection to studs behind wall.
- Use self-drilling screws when applying wall finishes (up to 2 layers).
- HeatShift pipes (4) 5” Ø connect to plenum or termination plates above, see “Appendix D” of Installer’s Manual.

From wall:
- 46-3/4” [1187 mm]

1/2” [13 mm] non-combustible cement board required in this zone. May be covered with max. 3/4” [19 mm] combustible finish. Combustible projections must otherwise conform to allowable clearances. See “Clearances to Combustibles” in Installer’s Manual.

11-1/4” [286 mm] (non-combustible clearance)
- 8” [204 mm]
- 15” [381 mm]
- 2” [51 mm]
- 10-1/4” [261 mm]
- 9-5/8” [245 mm]

Combustible finishing material allowed.

Max 1-1/4” [32 mm] thickness combustible wall finish allowed if within 4” of opening.

HeatShift plenum or duct plates framing required (top, front, or rear).

11-5/8” [295 mm]
- Min 1/4” [6 mm] gap between sections

Min 1/4” [6 mm] gap between sections

Non-combustible wall finish zone

Wall finish zone

30” [762 mm]
- Min 1/4” [6 mm] gap between sections

9-5/8” [245 mm]
